

SMID Cap Value Equity

Overview

The scale and speed of this quarter's equity market rout were unprecedented, marked by the fastest bear market descent in U.S. history. The wholesale selloff was staggering and unforeseen, but with no historical analog for the unfolding coronavirus pandemic and economic landscape, it was in many respects understandable. Volatility spiked meaningfully following a respite in 2019. Treasury yields plunged, growth again outperformed value, and larger capitalization issues beat their smaller counterparts. Against this backdrop, the Russell 2500™ Value Index (R25IV) declined by 34.64%, the worst quarterly result since its inception. Performance was broadly negative across Index constituents, ranging from bad in the Utilities and Consumer Staples sectors to atrocious in Energy, where freefalling demand converged with free-flowing supply.

Portfolio Performance & Developments

Following very strong absolute and relative performance throughout 2019, Cooke & Bieler's SMID Cap Value Strategy returned -36.38% gross of fees (-36.55% net of fees), underperforming the benchmark for the quarter. Significantly negative stock selection results were only somewhat offset by the positive overall impact of sector allocations. The portfolio's negative stock selection effect was almost entirely attributable to Industrials holdings, primarily from companies with exposure to air travel, an industry particularly affected by COVID-19 and the world's response to it. Other notable detractors included Health Care and Information Technology holdings, the negative impact of which was partially offset by positive results in Financials holdings. While the portfolio was hit hard on an absolute and relative basis this quarter, it has still outperformed the benchmark over 1, 3, and 5-year periods.

Five Largest Contributors/Detractors

	Avg Weight (%)	Total Return (%)	Contrib. to Return (bps)		Avg Weight (%)	Total Return (%)	Contrib. to Return (bps)
Hill-Rom	1.7	-11.1	4	Winnebago	4.5	-47.4	-217
Alleghany	0.2	5.1	3	Gildan Activewear	2.7	-56.4	-188
Arch Capital	0.1	0.6	1	AerCap	2.7	-62.9	-182
Entegris	0.5	-3.5	0	TCF Financial	3.4	-51.2	-176
Perrigo	1.6	-6.5	-12	Norwegian Cruise Line	0.9	-80.0	-159

Largest Contributors

Hill-Rom (HRC), the world's leading provider of hospital bed frames, bed surfaces, and patient lifting and moving systems, was the largest contributor. HRC performed well on expectations that strong demand for its hospital beds and respiratory products will keep earnings growing.

Alleghany (Y), a diversified insurance company, was the second-largest contributor. Y was a new portfolio holding this quarter, purchased after most of the market selloff. We were drawn to its defensive business model and long track record of value-added capital allocation decisions.

Arch Capital (ACGL), a Bermuda-based specialty property & casualty and mortgage insurer, was the third-largest contributor. Following strong performance early in the quarter, ACGL was eliminated to make room for better opportunities.

SMID Cap Value Equity

Largest Detractors

Winnbago (WGO), a leading manufacturer of recreational vehicles, was the largest detractor. WGO posted very strong topline progress in its first fiscal quarter, but has since temporarily shuttered production and will face declining near-term demand due to the COVID-19 pandemic. WGO's market share momentum is likely to return and it has ample liquidity to endure an extended and severe pullback in revenue.

Gildan Activewear (GIL), the largest basic apparel manufacturer, was the second-largest detractor. GIL saw an industrywide pullback in end-user demand for printwear products that has deteriorated further due to the impact of COVID-19. We believe GIL's conservative balance sheet will permit it to successfully weather this disruption.

AerCap (AER), the largest independent aircraft lessor, was the third-largest detractor. AER underperformed as its airline customers came under severe stress, with air travel grinding to a halt in the wake of the COVID-19 pandemic. AER is a secured creditor to airlines worldwide, with a young and attractive fleet whose planes should remain in strong demand in almost any airline scenario. Their conservative capital structure and ample funding flexibility give them the means to endure the current crisis and prosper on the other side.

Sector Positioning

Please see additional performance disclosures at the end of this document.

Sector allocation effect was additive for the quarter, offsetting a portion of the portfolio's negative stock selection outcome. An underweight to Energy was a significant tailwind as oil prices plummeted to \$20 a barrel, the lowest level in 18 years. The portfolio's overweight to Health Care was also additive – with demand increasing for products such as hospital beds – as was an underweight to Financials and an overweight to Industrials. Conversely, the largest headwind was an overweight to Consumer Discretionary. Underweights to Utilities, Consumer Staples, and Communications Services, all demand stable sectors that outperformed the broader benchmark amid fears of a deep recession, also hindered results.

SMID Cap Value Equity

Initiations

Alleghany (Y) is a classic C&B insurer. Conservative both financially and operationally, Y owns a handful of insurance companies that are well positioned in their respective niches. Their total return and long-term ownership mentality – over the last 50 years they have only had three CEOs – emphasizes solid returns while taking minimal risk. We believe their balance sheet is particularly well positioned to be opportunistic during market uncertainty.

Essent (ESNT) is a private mortgage insurer with a focus on managing credit risk, both through disciplined and granular underwriting on the front-end and the use of reinsurance on the back-end. As a relatively new entrant, ESNT benefits from an improved industry structure, including a new regulatory regime, new capital market solutions, and more rational competitors. These factors have led to improved industry economics for ESNT, resulting in a solid compounder with good downside protection through the credit cycle.

Norwegian Cruise Lines (NCLH) was added to the portfolio in the early stages of the coronavirus pandemic when it seemed likely the virus would be contained and the impacts muted. The stock underperformed significantly as the pandemic spread and the cruise industry – like many others – was forced to temporarily shut down. As with all portfolio holdings, NCLH was subject to a rigorous balance sheet and cash flow analysis focused on their ability to withstand unexpected events, and we believe the company has the balance sheet and financing to survive the current crisis. Once it has passed, we believe returns to investors could be considerable as the cruise industry is highly concentrated, with high barriers to entry and strong popularity with its customers.

Eliminations

Arch Capital (ACGL), **Crown (CCK)**, and **Entegris (ENTG)** were eliminated to make room for better opportunities.

Outlook

Across the globe, the coronavirus pandemic has upended expectations of all types – personal, political, social, and economic – in an astoundingly short time. Government attempts to slow the spread of the virus have resulted in an unprecedented halt to economic activity, countered in part by equally unprecedented fiscal and monetary stimulus actions. What happens next will depend heavily on how quickly the disease is contained and vaccines or other effective therapies are developed. As long as the range of possible outcomes for both the disease and its economic impact remains wide, markets are likely to remain extremely volatile. However, now is not a time to reflexively seek safety, or to rush blindly to call a bottom in the market. Now is the time for careful, disciplined analysis to uncover opportunities in the turmoil.
